**Free Seminar Offered by Fertility Associates of Memphis**

Join Dr. Paul Brezina with Fertility Associates of Memphis on Wednesday, April 24, from 6:00 to 7:00 pm as he discusses infertility and treatment options available as part of National Infertility Awareness Week.

The free educational seminar will help couples better understand their difficulties having children and explain infertility treatments ranging from oral medications to advanced reproductive technologies such as in vitro fertilization (IVF). Topics covered will include common causes of infertility, treatment options and success rates, the emotional side of infertility, and more. We allow ample time for questions at each seminar, too. Free informational handouts will be available on topics discussed.

Brezina will also discuss possible discounted cycles of in vitro fertilization for couples interested in participating in an upcoming clinical study of a drug designed to help the procedure work. Certain restrictions apply, including pharmaceutical company criteria, insurance coverage, and so forth.

The seminar will be held at Fertility Associates of Memphis, located at 80 Humphreys Center, Suite 307 at Baptist Women's Hospital in East Memphis. Registration is required and seating is limited, so please contact the office at 901-747-2229 ext. 105 to reserve your spot. Light refreshments will be served.

Brezina is the newest physician to join Fertility Associates of Memphis. He is board certified in OB/GYN and completed his fellowship in Reproductive Endocrinology & Infertility at the Johns Hopkins University School of Medicine. He and his wife have experienced infertility issues first-hand and now have four-year old twins thanks to in vitro fertilization.

**About Fertility Associates of Memphis**

Fertility Associates of Memphis is a state-of-the-art practice providing comprehensive reproductive health care to couples of the Mid-South and beyond...treating patients struggling with infertility, recurrent pregnancy loss, and reproductive disorders. Our highly specialized team of physicians utilizes cutting-edge techniques, including in vitro fertilization with laser blastocyst biopsy, preimplantation genetic diagnosis, and fertility preservation. Our compassionate physicians, board-certified in reproductive endocrinology and infertility, have been bringing dreams to life for more than 20 years.

**About National Infertility Awareness Week**

National Infertility Awareness Week (held April 21-27, 2013) is a movement that began in 1989 to raise awareness about infertility and encourage the public to understand their reproductive health. In 2010, National Infertility Awareness Week became a federally recognized health observance by the Department of Health and Human Services. For more information, visit online at [www.resolve.org/](http://www.resolve.org/).
